Global Health Curriculum Bootcamp

The Institute for Global Health Sciences hosts a professional development program for California high school teachers to bring global health topics into their classrooms. Teachers work directly with global health and education experts at UCSF to develop a curriculum tailored for their own students. The program includes a two-week summer course, collaborative work throughout the school year, and professional development stipends for qualifying teachers. Topics for the summer 2023 course include infectious disease epidemiology, public health data and surveillance, COVID-19, vaccines, and One Health.

The program will be hybrid. Teachers who are interested in meeting other teachers and program lecturers in person can attend classes on the UCSF Mission Bay campus. We will offer a Zoom option for those who prefer to attend remotely.

Application to Participate

Global health involves multiple disciplines, and for that reason the Bootcamp is open to teachers of any subject – including science, history, geography, economics, and more. Teachers do not need previous global health experience, only an interest in global health and a desire to incorporate it into the courses they teach. Participants may qualify for a professional development stipend. The [online application](#) is now open.

Important Dates

March 31, 2023

Application deadline

April 28, 2023

Applicants notified of their admission status

June 20 – June 30, 2023

Summer course
